

Public Report

Hy-Vee Tuna Fishing Vessel List January - October 2022

Report Date: April 2023

Introduction

For the second year in a row, Hy-Vee Inc., wholly-owned distribution subsidiary Perishable Distributors of Iowa (PDI), and [FishWise](#), a non-profit sustainable seafood consultancy, have completed a fishing vessel transparency activity designed to shed light on the complexity of the company's tuna supply chains. Tuna are harvested globally, often in remote regions of the ocean where illegal fishing and human and labor rights abuses can occur without detection¹.

The primary benefit of conducting a fishing vessel verification activity is gaining greater visibility into the supply chain, identifying raw material providers, and proactively engaging with supply chain partners to prevent and mitigate risks for illegal fishing activities and social issues. To date, Hy-Vee remains the only U.S. retailer to undertake this activity publicly.

¹ <https://www.saltraceability.org/tuna-supply-chain/>

FishWise is a non-profit seafood sustainability consultancy partnered with Hy-Vee since 2011 to develop and guide its nationally recognized [Responsible Choice](#) seafood program. In 2022-2023, FishWise worked closely with Hy-Vee and its tuna suppliers to collect and verify the names of tuna fishing vessels in Hy-Vee's supply chains and, for a subset of vessels, trial new tools that can aid the detection of illegal fishing behaviors at sea.

In 2022-2023, FishWise expanded the data set by collecting data from three tuna suppliers (national brand and private label), an increase from the previous year², and extending the data set from 6 to 10 months. Additionally, FishWise trialed the Global Fishing Watch Vessel Viewer portal (a non-public resource when the analysis was conducted) on a subset of fishing vessels to verify compliance with [Hy-Vee's tuna sourcing commitments](#).

Key Findings

FishWise and Hy-Vee cross-referenced each unique fishing vessel name (excluding handline vessels³) with the [ISSF Proactive Vessel Register](#), [Regional Fisheries Management Organizations \(RFMO\) vessel lists](#), [IUU Vessel List](#), FishWise Labor Allegations List (*non-public resource*), and the [Global Fishing Watch](#) (GFW) database.

From this activity, FishWise identified 4,706 handline vessels; 167 pole and line vessels; 44 longline vessels; 44 purse seine vessels; one troll vessel; and one gillnet vessel contributing to Hy-Vee tuna assortments from January-October 2022. The large number of fishing vessels is indicative of the size and complexity of global tuna supply chains.

As early adopters of this level of transparency, Hy-Vee and FishWise hope other U.S. retailers will follow suit, effectively normalizing business efforts to attain greater visibility into high-risk supply chains. National brand suppliers [Bumble Bee](#) and [Chicken of the Sea](#) have developed their own publicly accessible traceability tools for the same purpose. While public disclosure of supply chains is relatively common in other sectors, a lack of data and verification capabilities has historically impeded efforts to attain end-to-end transparency in global seafood supply chains⁴.

² All participating tuna suppliers elected to remain anonymous for this activity.

³ Handline fishing vessels are usually too small to require an IMO, MMSI, or UVI number. These fishing vessels are also too numerous to list in Table 1. Handline fishing vessel names can be made available upon request.

Hy-Vee Action Plan

Based on the activity, Hy-Vee will prioritize three actions over the next 12 months:

- Regularly evaluate supply chain risk and proactively engage with seafood suppliers to identify and remediate issues.
- Update internal processes to address issues of non-compliance with Hy-Vee standards, if identified.
- Incorporate the tuna fishing vessel transparency activity as part of Hy-Vee’s seafood supply chain due diligence plan.

Appendix 1: Tuna Fishing Vessel List

Fishing vessel name data has been anonymized and aggregated to protect supplier confidentiality. The fishing vessels below contributed raw materials to Hy-Vee’s private label and some national brand tuna assortments from January-October 2022. The fishing vessel list is not comprehensive, as not all national brand tuna suppliers elected to participate in the activity, and the handline vessels are too numerous to fit in the table (n=4,706). Some fishing vessel names appear multiple times as they supply more than one species to the assortments. Individual fishing vessels supplying tuna are subject to change year-to-year as sourcing is highly dynamic.

Table 1: Hy-Vee aggregated and anonymized tuna fishing vessels by species and gear type.

Tuna Type	Gear Type	Fishing Vessel Names	IMO Number/MMSI/UVI/ Call Sign (If Available)
Albacore Tuna	<i>Unconfirmed - pole and line, troll, or handline</i>	Ali J	Registration Number: 989260
	Pole and Line	Atago Maru No.21	9234927
	Troll	Charlotte M	8781105
	Pole and Line	Dayna S	9204300
		Eikichi Maru	8935433
		Eikichi Maru No.2	<i>Vessel too small to be registered by WCPFC; Japanese registration document received</i>

Tuna Type	Gear Type	Fishing Vessel Names	IMO Number/MMSI/UVI/ Call Sign (If Available)
		Fukuei Maru No.11	8892459
		Fukutoku Maru No. 78	8948947
		Fukutoku Maru No. 88	9155298
		Fukuyoshi Maru No.28	6907949
		Genkichi Maru No.27	8980464
		Griffin	8567432
		Gypsy Rose	MMSI: 601043500
		Ichi Maru No. 28	9126493
		Inari Maru No.83	9156747
		Jinichi Maru	8890504
	<i>Unconfirmed - pole and line, troll, or handline</i>	Judy	Registration Number: 548600
	Pole and Line	Jyunyo Maru	8853788
		Kaitoku Maru No.23	8899603
		Kentucky	MMSI: 601404000
		Kiyo Maru No.18	9161601
